SUMMARY

AI/ML and backend engineer skilled in generative AI, LLMs, backend APIs (FastAPI), and cybersecurity/VAPT — with a peer-reviewed publication in real-time threat detection.

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, TypeScript, SQL, HTML

AI/ML: Deep Learning, NLP, Generative AI, LLMs, TensorFlow, OpenCV, OpenAI, Gemini, FAISS

Cybersecurity: VAPT, OWASP Top 10, API Security, Network Security, XSS, SQL Injection

Web & Backend: FastAPI, REST APIs, React, PostgreSQL, Docker, AWS S3, Git, Linux

EXPERIENCE

Data Science & Machine Learning Intern | DCI (Dot Com Infoway)

3 Months

- Built AI-driven recruitment automation using Python, FastAPI, and OpenAI for screening, parsing, and scheduling.

Cybersecurity Intern | HDLC Technologies

Jun 2025 – Jul 2025

- Conducted network security assessments, ethical hacking, and XSS/SQL injection testing, hardening Linux systems.

Cybersecurity Intern | Rinex Technology (with Hipla, IIT Bhubaneswar E-Cell)

Jul 2024 – Sep 2024

- Performed network penetration testing, Wi-Fi ethical hacking, and vulnerability exploitation. Certificate ID: CS24-RNIO-7112.

Founder | DashRudhra Consultancy & AI × Cybersecurity Community

Present

- Delivered AI and cybersecurity-driven solutions for schools and colleges through DashRudhra Consultancy.
- Led a student community focused on AI security and emerging technologies.

Event Coordinator | TechXplosion'24 & Deploython Hackathon, SRM MCET

2024

- Managed a debugging competition and coordinated hackathon technical events.

PROJECTS

AI HR Recruitment Assistant | AI Recruitment Automation Platform

- Built a multi-agent AI recruitment platform automating candidate screening and interview scheduling.
- Developed resume parsing, semantic candidate matching, and automated scheduling using OpenAI, FAISS, and FastAPI.

Civic Connect / JanVaani | AI-Powered Multilingual Civic Complaint Platform

- Developed a multilingual civic reporting platform for text, voice, and image complaints.
- Integrated Gemini AI for transcription and translation; built a GIS dashboard with Leaflet, deployed as a PWA.

AirGuard – Pollution Prediction System | Bi-LSTM, TensorFlow, IoT

- Built a multi-source pollution forecasting pipeline from IoT, satellite, and weather data.
- Designed a Bi-LSTM with attention in TensorFlow for PM2.5 and AQI prediction.

Additional Projects: SentinelWatch – Threat Detection (YOLO, OpenCV) • Niral – IoT Smart Toilet System (TNSDC & Anna University) • Bio Contamination Detector (ESP32-CAM) • Exam Hall Planner (React).

CYBERSECURITY RESEARCH & VULNERABILITY ASSESSMENT

Independent Security Research | Web VAPT • Phishing • API Security • OWASP

github.com/mackshema

- Web VAPT: Assessed a self-built web app with OWASP ZAP, Nmap, and SSL Labs; found CSP, CORS, and HSTS gaps.
- Phishing Detection: Analyzed phishing samples via header, WHOIS, and URL-reputation analysis; graded by severity.
- API Security: Tested a REST API with Postman against the OWASP API Top 10; found IDOR/BOLA and weak rate limits.

RESEARCH PUBLICATION

Explainable Deep Spatiotemporal Learning Framework for Real-Time Loitering-Based Street Crime Detection in Low-Light and Dense Urban Environments

Publisher: Springer Nature Computer Science | **Status:** Reviews Completed – Awaiting Final Decision

EDUCATION

B.E. Computer Science (Cybersecurity Specialization)

Expected: June 2027

SRM Madurai College of Engineering & Technology, Tamil Nadu | CGPA: 7.39/10 (3rd Year)

CERTIFICATIONS

IBM: Generative AI, Artificial Intelligence | Microsoft: OS & Security | SRMIST: Internet of Things | NPTEL: Cloud Computing, Data Mining.
